

Clarification

A Whitefish Lake Institute 2012 report, "Investigation of Septic Leachate to Shoreline Area of Whitefish Lake" reported the results of the institute's scientific research, but did not offer engineering solutions or recommendations.

A preliminary engineering report complet-

ed earlier this year by Carver Engineering, in partnership with Whitefish Lake Institute, focused on the designated Lion Mountain study area. That report outlined septic and sewer alternatives for Lion Mountain and possible incentives for utility connection and annexation.
