Summer intern

intern@whitefishlake.org

Currently, I'm finishing my classes at Flathead Valley Community College and preparing to transfer to the University of Montana in the fall. I'm excited to continue my degree in environmental science, with an emphasis on water resources. My interest in water began from a young age. As a child, I remember frequenting a stream near my home, and wading through its icy waters until my feet were numb. Memories such as these inspired me to pursue my degree, where I've had many opportunities to explore my interests. I've taken a wide variety of classes such as botany, soil science, ArcGIS, and forest insects and diseases. In the summer of 2018, I was a crew member with the Montana Conservation Corps. In addition to trail maintenance and building, I learned the importance of working as a team and encouraging people to use outdoor spaces responsibly. Outside of school, I enjoy hiking, playing tennis, and practicing yoga. I'm grateful for the opportunity to work with Whitefish Lake Institute. I look forward to furthering their incredible mission by helping with data collection, community engagement, and the overall conservation of the Whitefish Lake Watershed.
